

SL 337 EXPANSION PROJECT

New Braunfels High School Traffic Switch

Work continues to widen SL 337 from two-lanes to a four-lane divided highway. The new southbound lanes from River Road to SH 46 have been constructed and are ready for traffic. Beginning April 9, 2019 the new southbound lanes will be opened. Work will then begin on the existing lanes of SL 337, with one northbound lane remaining open. Opening the new lanes will change the access to New Braunfels High School (see diagram).

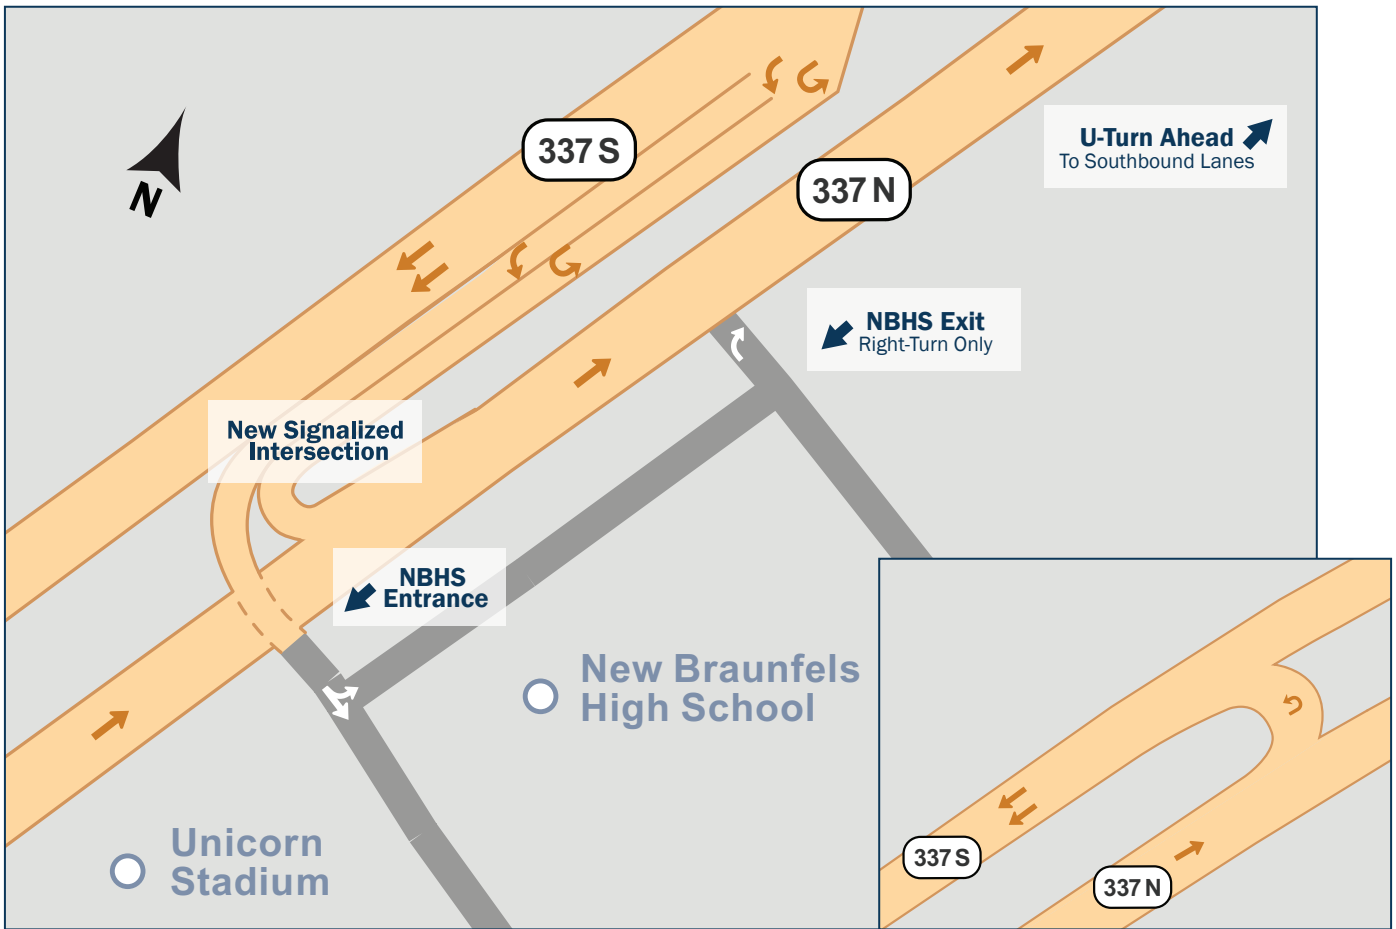

Diagram 1: New Braunfels High School Traffic switch

Diagram 2: U-Turn to Southbound lanes

School Entrance

Northbound traffic will enter the high school as normal once they pass the football stadium. Southbound traffic will have signalized intersection to make a left turn into the school entrance.

School Exit

Traffic will exit New Braunfels High School the same as it does today, but from only one lane. Motorists needing to travel southbound along SL 337 will exit heading northbound and use the new signalized U-turn near Oakwood Baptist Church to get onto the southbound lanes.

Signs have been placed to inform drivers of the change. Additional signage will be placed to help guide drivers.
